Satyam

Software Engineer

hi@satyvm.com | +91 9555275348 | Delhi, India
satyam.cv | linkedin.com/in/satyvm | github.com/satyvm

Fintech engineer specializing in Python/TypeScript, AWS, CI/CD, private cloud, observability, networking, and blockchain.

Experience

Software Engineer August 2026 – Present
Golden Hills Capital India Pvt Ltd – Full-time *Hyderabad, India – On-site*

Founding Engineer – Backend & Infrastructure May 2025 – December 2025
2Cents Group – Valura.AI, FinTech Startup *Remote / Bengaluru, India*

- Engineered production backend systems for an AI financial advisor, and portfolio-monitoring platform using **TypeScript, Python, FastAPI, PostgreSQL, MongoDB, TimescaleDB, and Prisma**.
- Built an **LLM-powered financial advisor** using **Agno Framework** and Gemini APIs, integrating Exa and Yahoo Finance for real-time market context, Server-Sent Events (SSE) for streaming responses, and **Microsoft Presidio** for PII redaction.
- Developed portfolio analytics and monitoring workflows using **TimescaleDB and SnapTrade**, for investment-risk analysis.
- Built production **AWS infrastructure** with **ECS, EC2, ALB, S3, RDS, and Cognito**, isolating environments for web/mobile apps serving **5,000+ MAU**; maintained **99.6% availability** using Multi-AZ, auto-scaling, health checks, and rolling deploys.
- Built end-to-end **GitHub Actions CI/CD** with self-hosted runners, automated code-quality checks, SAST, DAST, and software-composition analysis integrated into deployment workflow.
- Deployed enterprise **HPE bare metal** and built a Proxmox private-cloud environment for Linux/Windows VMs and containers supporting trading, testing, and production workloads with segmented networking with **OPNsense**.
- Led infrastructure/security readiness for **SCA Category 5 licensing and ISO 27001** audit preparation.

Quant Developer – Crypto August 2024 – May 2025
2Cents Group – 2Cents Capital, Hedge Fund Startup *Remote / Bengaluru, India*

- Conducted manual technical/economic diligence on emerging **Web3 protocols and ICO/IDO projects**, evaluating architecture, tokenomics, teams, open-source development activity, and ecosystem viability prior to investment.
- Developed an **LLM-based classification and evaluation engine** analyzing project vision, tokenomics, founding teams, open-source repositories, and community signals, enabling evaluation of **500+ ICO/IDO opportunities**.
- Built an automated **stablecoin yield-allocation pipeline** across staking, lending, and liquidity protocols, dynamically scoring opportunities using **30+ network, protocol, market, and asset indicators**.
- Developed and deployed **10+ crypto trading strategies** using live capital, generating an aggregated **18.5% ROI over a year**.
- Deployed a **Solana arbitrage bot** (notarb) targeting on-chain price discrepancies, generating a reported **12.6% ROI over six months**.
- Represented the fund in **Dubai, UAE**, presenting crypto investment strategies and research to **50+ high-net-worth investors**.
- Led a **four-person crypto analytics team**, coordinating research, engineering tasks, and delivery of investment-related goals.

Projects

NodeOps | *AWS, Terraform, Docker, Prometheus, Grafana, Linux* Personal Project

- Automated **one-command Ethereum node deployment on AWS using Terraform**, including provisioning and node configuration.
- Implemented RPC health monitoring, metrics collection, dashboards, and alerting using **Prometheus, Grafana, and Alertmanager** to simulate production blockchain-node operations.

FluXtream.co | *Next.js, Tailwind CSS, Aptos, Move* December 2023 – January 2024

- Built a decentralized crypto-streaming platform on **Aptos** during the **IIT Bombay Aptos Winter School**, enabling continuous token transfers through smart contracts; developed it in a **three-person team** and deployed a beta used by **50+ users**.

Technical Skills

Programming: Python, TypeScript/JavaScript, Bash, SQL, Rust, Solidity, Move, Cairo

Backend & Data: FastAPI, Node.js, PostgreSQL, TimescaleDB, MongoDB, Prisma, REST APIs, SSE

Cloud & Infrastructure: AWS, GCP, Docker, Kubernetes, Terraform, Linux, Proxmox, Bare Metal, GitHub Actions, Jenkins

Networking & Observability: OPNsense, WireGuard, Prometheus, Grafana, Alertmanager

Blockchain: Ethereum/EVM, Solana, Aptos, Smart Contracts, Blockchain Nodes, RPC Infrastructure

Education

Indian Institute of Technology Madras Chennai, India
B.Tech., Naval Architecture and Ocean Engineering (CGPA: 7.86) *May 2020 – June 2024*

Seoul National University Seoul, South Korea
Semester Exchange – Computer Science *February 2023 – June 2023*

Certifications

FinTech Industry Professional (FTIP®) | *Corporate Finance Institute (CFI)* Issued May 2026
